EBADULLAH **SIDDIQI**

Lahore Pakistan | +92 311 4501997 | dev.ebadullah@gmail.com

Summary

At the age of 19, I'm running two SaaS apps. I'm constantly learning, improving, and testing my skills. Hi, I'm **Ebadullah Siddiqi**. I'm an Indie Hacker and a Full-Stack Developer. After gaining some experience as a solo developer, I'm now in search of an opportunity that'll help me connect with industry professionals and learn better management skills. The greatest asset I believe I own is my dedication to a task. When my team needed an urgent website, I delivered a full website in a very short period.

Skills

- JavaScript development
- Node.js as a development environment
- Express.js for the server
- MongoDB for databases
- GraphQL for Better API Calls
- React.js & Tailwind CSS for Frontend Development
- Currently using Next.js as a full-stack framework
